Manjunath H K

Senior SDET | API & UI Automation | Java, Python, Microservices | AI-Augmented Testing

Bengaluru, India • +917337813770 • manjunathhk833@gmail.com • linkedin.com/in/manjunath-h-k/ • github.com/manjunathk833 • manjunathhk.netlify.app/

PROFESSIONAL SUMMARY

Senior SDET with 7 years of experience building API and UI automation frameworks for airline, quick-commerce and OTT platforms on microservice architectures. Drives automation best practices and code reviews across a 10+ member QA team, and builds AI-driven testing tools (LLM-based defect filing, Copilot STLC agents) that cut delivery time by 60%. Core stack: Java, Python, REST Assured, Selenium, Cucumber BDD, Docker and Harness/Jenkins CI/CD; reduced regression effort by 90% across 6+ airline programs.

CORE TECHNICAL SKILLS

Languages: Java, Python, SQL, Groovy

Test Automation: REST Assured, Selenium WebDriver, Selenium, Playwright, Appium, Cucumber BDD, Cucumber, BDD, TestNG, ReadyAPI, Postman

CI/CD & Infrastructure: Harness, Jenkins, TeamCity, GitHub Actions, Azure DevOps, Docker, Kubernetes, GCP, Maven, Git

Observability & Quality: Kibana, Dynatrace, Kafka (event-log monitoring), Kafka, Google Metrics Explorer, Allure, Charles Proxy, Burp Suite, PostgreSQL, Jira, Zephyr, TestRail

AI in Testing: GitHub Copilot, Copilot, Agentic AI, Claude, Gemini, Ollama, GitHub AI API

Practices: Microservices & API Testing, BDD, Page Object Model, Smoke/Regression Strategy, Shift-Left, Code Review, Agile/Scrum

EXPERIENCE

Senior Engineer - QE | **ValueLabs** Jun 2023 – Present

- Automation Practices & Code Review: Drove automation best practices and processes for a 10+ member QA team: mentored engineers, defined automation coding standards, and reviewed 95% of pull requests across project repositories; authored 500+ commits across multiple API and UI automation projects.
- Mosaic Automation Framework: Architected the Mosaic UI and API automation framework (Java, REST Assured, Selenium with Page Object Model, Cucumber BDD) for a portfolio of 6+ airline programs; 1,500+ tests cut regression effort from 1,125 to 125 man-hours (90%). Containerized suites with Docker and ran daily/weekly smoke and regression in Harness CI/CD (previously TeamCity).
- AI Defect Automation: Built an AI-driven Azure DevOps defect pipeline in the REST Assured framework that auto-files bugs when failure-to-user-story confidence exceeds 95%, cutting initial triage and bug-filing effort by 70%.
- AI Quality Insights: Developed an AI-driven EQE best-practices tracker (Python, Microsoft Teams webhooks, GitHub AI API, Ollama) giving sprint-level compliance insights across projects and removing 80% of manual monitoring.
- Log Monitoring: Automated daily error-log analysis across 30+ microservices using Kibana, Dynatrace and Kafka event logs, catching 2–4 critical defects before each release.
- AI Initiatives: Designed Copilot-based AI agents automating STLC workflows with Azure DevOps and Maven, reducing delivery time by 60%.

SDET-1 | **Dunzo** Aug 2022 – Jun 2023

- Automated end-to-end API flows and PostgreSQL validations using the Ekam Java framework for 4 key features, reaching 60% test coverage across the microservices-based Merchant Service.
- Ran Dockerized regression and feature suites through Jenkins CI/CD; owned feature quality from planning through deployment with minimal production defect leakage.

- Led observability-driven root-cause analysis of daily stability failures with Allure, Google Metrics Explorer and Kibana on GCP; ran and monitored Merchant Service containers via Docker and Kubernetes (kubectl) for service-failure and DB testing.

Senior Engineer, QA | **Tata Elxsi** Dec 2019 – Aug 2022

Career progression: Senior Engineer, QA (Jul 2021 – Aug 2022); Engineer, QA (Dec 2019 – Jul 2021)

- Designed a BDD automation framework using Python, Appium and the TestRail API; automated 50% of the sanity suite, saving 5 man-days per month across Web and Mobile.
- Contributed to a $12M+ OTT app under Agile; improved the iOS App Store rating from 1.9 to 3.5 through systematic API and stability testing.
- Performed domain API, stability and KPI testing for Web and iOS using Charles Proxy, Postman and Burp Suite.

PROJECTS

LSY: API + UI Automation (ValueLabs, Mosaic Portfolio) Jan 2026 – Present

300+ tests across 12+ microservices including UI payment flows; Agentic AI cut automation effort by 75% and test authoring effort by 90%. Stack: Java, REST Assured, Selenium, Copilot, Harness CI/CD.

- 300+ tests across 12+ microservices including UI payment flows;
- Agentic AI cut automation effort by 75% and test authoring effort by 90%.
- Stack: Java, REST Assured, Selenium, Copilot, Harness CI/CD.

SSR: Special Service Requests (ValueLabs, Mosaic Portfolio) Jan 2024 – Jan 2026

300+ API tests on airline Special Service Request workflows; 15+ critical defects found. Stack: Java, REST Assured, Cucumber BDD, Harness CI/CD.

- 300+ API tests on airline Special Service Request workflows;
- 15+ critical defects found.
- Stack: Java, REST Assured, Cucumber BDD, Harness CI/CD.

PNR Linking (ValueLabs, Mosaic Portfolio) Jun 2023 – Jan 2025

600+ API tests for linking PNRs to share seat benefits; 50+ defects found and 90% less manual testing effort. Stack: Java, ReadyAPI, Groovy, REST Assured, Harness, Azure DevOps.

- 600+ API tests for linking PNRs to share seat benefits;
- 50+ defects found and 90% less manual testing effort.
- Stack: Java, ReadyAPI, Groovy, REST Assured, Harness, Azure DevOps.

CERTIFICATIONS & AWARDS

- **ACE – AI Agents Certified Engineer** (ValueLabs) - 2025
- **Employee of the Month** by ValueLabs - 2025
- **Bravo Award** by Tata Elxsi - 2020

EDUCATION

Sri Jayachamarajendra College of Engineering | B.E. in Computer Science (Information Science) 2015 – 2019

CGPA: 8.02 / 10
